Infrastructural Potential Airway Transportation

Lipetsk airport works with airplanes up to 60 tons of take-off weight. Regular and charter flights to various destinations in Russia. Present runway length – 2.3 km.

Works are under way to start international flights, to lengthen the runway up to 2.8 km long to take airplanes up to 195 tons of take-off weight. The renovation and development project is aimed at Lipetsk airport modernization involving foundation of permanent airborne cargo and passenger Russian border checkpoint.

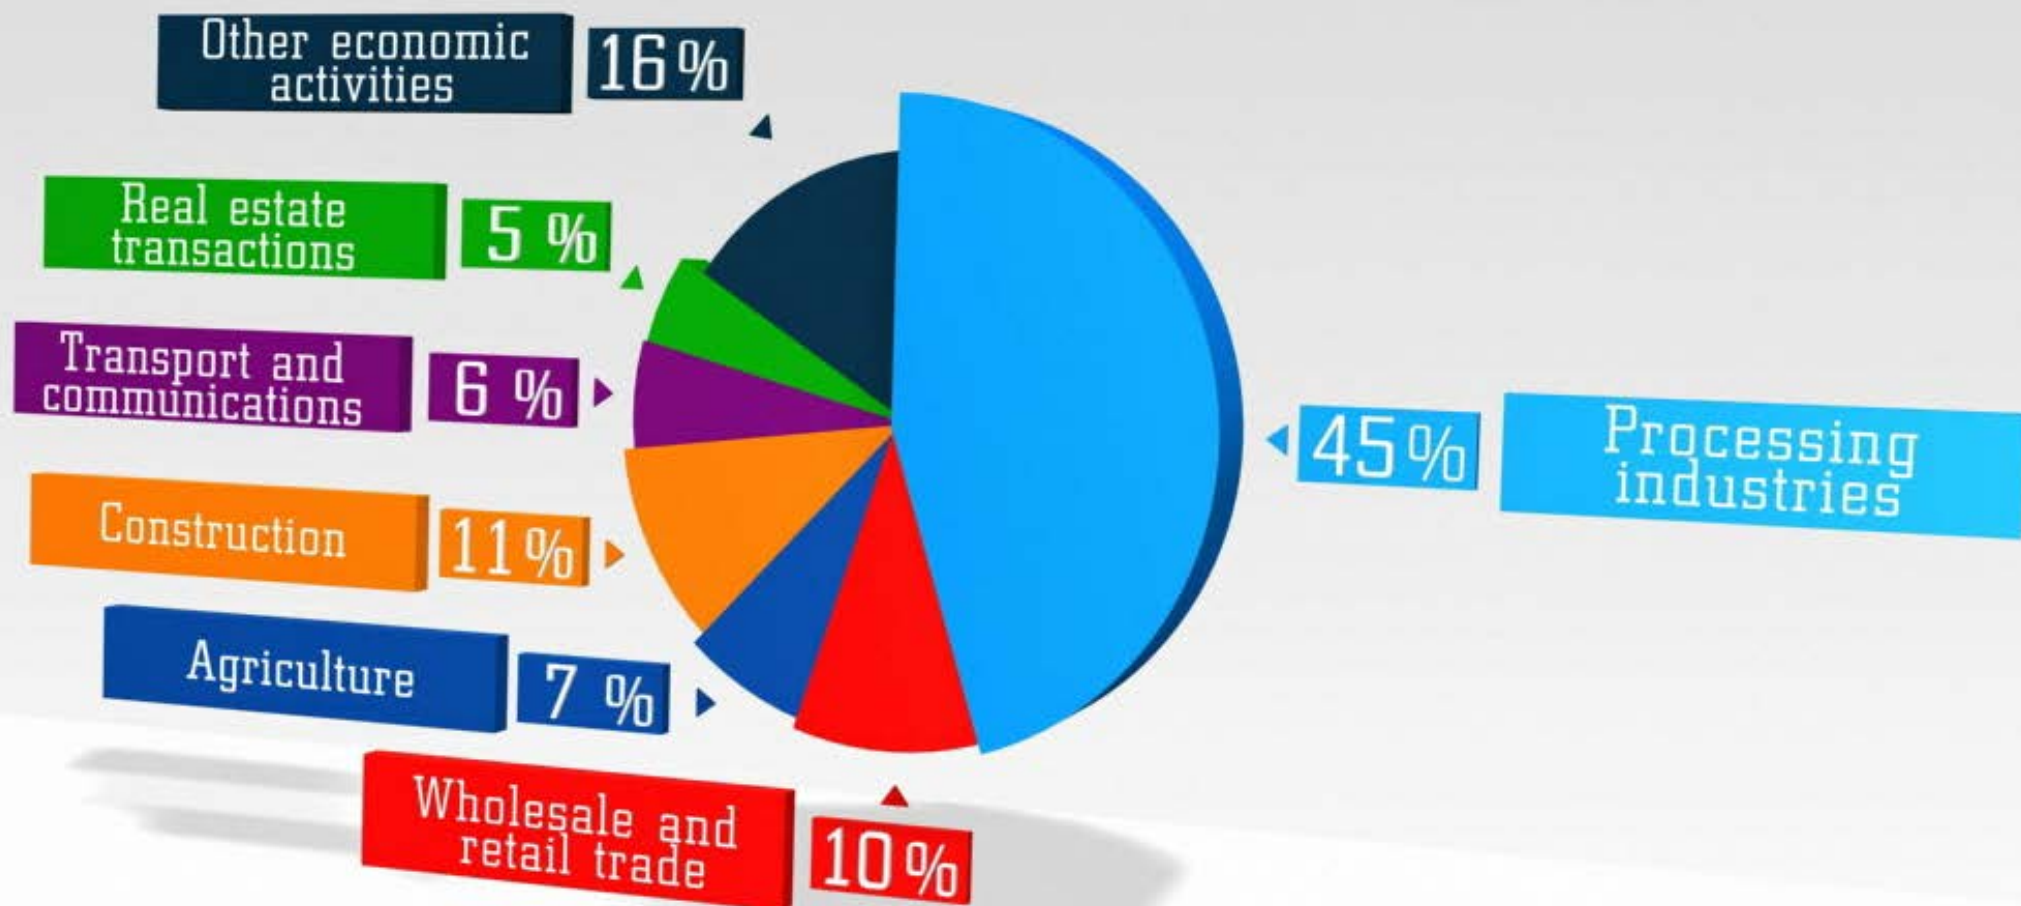

Project involves reconstruction and expanding of taxi strips, airport apron, replacement of airway lighting, radio and meteorological equipment, construction of cargo handling terminal, arrangement of Russian border checkpoint.
